

Reftech International Announces the Acquisition of BMI Refractories.

October 10th, 2018 – Reftech International Corp. has acquired the assets of BMI Refractories, a refractory supply and installation company that predominantly caters to both the steel and power generation industry. With the acquisition of BMI Refractories, Reftech gains more than 25+ full time staff members with many years of experience within the industry, as well as over 100 seasonal employees and professional refractory installers. Reftech International now operates from 7 locations across the United States, including Riverview Michigan, Lorain Ohio, Gary Indiana, Owensboro Kentucky, Philadelphia Pennsylvania, Baton Rouge Louisiana, and a head office in Carnegie Pennsylvania, enabling them to better respond to the needs of their customers across the country in a timelier manner.

“It was a strategic move which allows us to capitalize on the synergistic effects while keeping growth in mind” says General Manger of US Operations Anthony Sanniti. Reftech International specializes in refractory engineering and installations for the Petrochemical, Cement, Aluminum, Iron Ore, Incineration, Lime, Pulp and Paper, Steel, and Power Generation Industries. “The BMI team is comprised of a very talented group of individuals both in the office and on the field that will help Reftech service our customers and grow our installation capabilities across the USA,” says Sanniti. Moving forward, BMI activities will be executed under Reftech International Corp. Combined with 6 locations across Canada, the acquisition makes the Reftech International Group one of the largest refractory installation companies in North America.
